Waste Warriors waste wise business smart

Six Steps to Success

Here is your 6-step guide to improving waste habits in your business. It's quick, simple and easy to implement!

TOP TIPS FOR CUTTING WASTE

1. Engage your staff and talk to them about the new initiatives. Staff can be our greatest allies in identifying how we can recycle better.

2. See what you can recycle. So much can be recycled these days. Everything from cardboard, hard and soft plastics, glass, food waste and more!

3. Set waste targets. It is as easy as identifying that you could reduce your waste skip pickup by once a week and have a comingled recycling bin picked up instead! It is actually cheaper to recycle than to send waste to landfill!

4. Label your bins. Print out the signage we sent or contact us to find out how to get stickers for your bins.

5. Measure your success.

6. Send us your story! We love to promote businesses that make positive change. Just a picture and a couple of sentences is all we need!
